

ProFramework

SAP Solution – Application Framework

Functions

- Extensive basic functions for the development of new applications
- Modern and simple architecture
- Excellent performance
- Absolutely UI neutral implementation
- Significant reduction in development costs
- Avoidance of code redundancies
- Adaptation of input forms via graphical editor without programming knowledge
- Simple and logical customising
- Complete development documentation of all core components
- Display of error and warning messages in forms directly in the affected fields ("Fiori-like")
- Function-dependent, rule-based form control
- Clear representation in the surfaces
 - More overview thanks to widget title bar with specific functions
 - More space for important information about minimizing and maximizing widgets
- Multiple selection
 - Simultaneous execution of a function on several objects
 - Intelligent structure of context menus depending on the selected objects
- Simple and consistent operation
 - Only functions that the user can actually execute are offered
 - Uniform standard behavior (double-click, links)
 - Widget and object-context-sensitive menus

User interface

- Interfaces
 - Highly flexible interfaces
 - Multiple layouts per application
 - Object-, role- and user-specific
 - Individually adaptable at runtime
- Innovative input forms
 - Configurable forms for creation, maintenance and display

PRODUCT FACTS

ProFramework is an intuitive and powerful middleware for modern, flexible and user-friendly multi-object and multi-layout applications. These are available in the SAP GUI and SAP Fiori Launchpad. Thanks to the architecture of ProFramework, the development effort is minimised and a uniform implementation of all application components is ensured.

- Uniform and widget overlapping Drag'n'Drop
- Maximum use of the interaction possibilities
- Full keyboard control of pop-ups
 - Intelligent and high-performance tables
 - Thanks to a sophisticated mechanism, only data that is actually needed is loaded
 - Multiple enterprise-wide and user-specific layouts
 - Intelligent sorting via hierarchies
 - Filters with just two clicks thanks to quick filters

Advantages

- Excellent user experience
- Unlimited number of applications, layouts and objects
- Predefined customising templates for numerous ProNova applications
- Outstanding performance
- UI neutral and therefore open for new UI technologies

Properties

- Customizing environment for extensive configuration
- Extensive extension options using BAdIs
- Adaptation of widget content without ABAP development
- Language support for German, English and French
- Detailed documentation in German and English

PRIMARY FUNCTIONS

ProFramework enables the development of new applications with relatively little effort. The excellently implemented operating philosophy offers end users a unique user experience.

- Various tools for the development of new applications
- Easily comprehensible architecture
- Reduced development costs
- Personalisable surfaces
- Redundancy-free implementation of application components

Developing new applications is intuitive with ProFramework. This extremely user-friendly SAP solution reduces development efforts, but at the same time ensures that individual components can be implemented uniformly and redundancy-free.
